***Priority***

The first sentence of the specification needs to be updated to include the patent number of the parent application.

***Claim Objections***

Claim 6 is objected to because of the following informalities: in line 2, "device" should be inserted after "decelerator" and in line 5, "container (51)" should be "container (6)". Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For claim 1, it is unclear what is the scope of the invention. The preamble of the claim is directed to only the closing device (the sliding portions of the furniture appearing in intended use"for" statements); however, the body of claim is directed to the combination of the device with the portions (e.g. "container fasteneded to a fixed or sliding portion of the article of furniture"). For claim 2, it is unclear whether or not the "a guide" is the same guide claimed previously (note: the container of the closure device is the feature that includes the guide). For claim 3, it is unclear whether or not the "a container" is the same container claimed previously. For claim 4, it is unclear

whether or not the "a groove" is the same groove claimed previously and it is unclear whether or not the "a container" is the same container claimed previously. For claim 5, it is unclear what is the scope of the invention. The preamble of the claim is directed to only the closing device (the extractable portions of furniture appearing in intended use/"for" statements); however, the body of claim is directed to the combination of the device with the portions (e.g. "container fastened to one of the fixed or mobile portions of the guides"). Also for claim 5, "the body..." lacks antecedent basis and stating that the oil deceleration device is of a "known type" is indefinite (many types are known in the art so it is unclear which are included here).

### ***Allowable Subject Matter***

Claims 1 and 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action. (The allowable subject matter for claim 1 being the closing device for a drawer guide assembly comprised of a container, a mechanical energy accumulator received in the container, an actuation member slidable in a guide of the container, a pulling member interacting with the actuation member, a second container with a piston or propeller, a high viscosity grease received in the second container and adapted to slow the movement of the actuation member, and a contrast member directly or indirectly connected to the pulling member which stresses the piston/propeller. The allowable subject matter for claim 5 being the closing device for a drawer guide assembly comprised of a container, a

mechanical energy accumulator received in the container, an actuation member slidable in a guide of the container, a pulling member interacting with/stressed in the closing direction by the actuation member, an oil deceleration device on a side projecting part of the container, and a contrast member directly connected to the pulling member.)

Claims 2-4, 6 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
